PROFILE SUMMARY

I am a self-taught web developer with strong expertise in building robust, scalable, and user-friendly web applications. I have experience in creating websites, marketplaces, and internal systems, with a focus on clean code, smooth functionality, and seamless user experience.

While my primary focus is web development, I also have experience in React Native for mobile apps, allowing me to deliver integrated solutions when needed.

I have successfully completed high-rated freelance projects and am committed to turning client ideas into high-quality, reliable web products.

WORK EXPERIENCE

Freelance Web & Mobile Developer | Self-Employed | 2022 - Present

- Developed robust and scalable web applications, focusing on e-commerce platforms, internal systems, and marketplaces.
- Successfully completed high-rated projects, including:
- Al-Rayan Store (متجر الريان): A multi-vendor online marketplace with smooth user experience, secure payment integration, and advanced product management features.
- Maswaq (مسواق): A high-traffic e-commerce platform, optimized for performance and reliability, receiving excellent client feedback.
- Delivered complementary mobile applications using React Native for selected projects.
- Integrated APIs, managed databases, and ensured secure, efficient, and user-friendly interfaces.
- Web Developer - Educational Platform Project | Independent Project | 2023
- Built a comprehensive web platform for an educational institute, including student management, course tracking, and reporting.
- Designed intuitive interfaces and ensured smooth functionality for both administrators and students.
- React Native App Developer - Booking System | Independent Project | 2023
- Developed a booking system for venue reservations with real-time availability checks and calendar integration.
- Implemented Firebase backend for data management and seamless user interactions.
